Summary

Product Manager with 8+ years of experience in BFSI and fintech, with a track record of delivering measurable outcomes across credit card lifecycle management, digital onboarding, and workflow automation. Reduced onboarding TAT by 30%, eliminated 40% of KYC/FATCA errors, and owned 70% automation scope on credit decisioning flows across HDFC AMC, ICICI Bank, and BoB Card. Currently building depth in AI product design — writing PRDs for LLM-assisted workflows and intelligent automation frameworks — and looking to bring that combined domain and AI product thinking into a full-time senior PM role.

Work Experience

Glint India Technologies Pvt. Ltd. – Product & Business Consultant (Project Based) May 2024 – Present

- **Authored end-to-end PRDs** for AI-assisted workflow automation use cases — defining data inputs, operational logic, expected outputs, and success KPIs aligned with business and compliance requirements.
- Collaborated on defining enterprise copilot use cases for planning and operational visibility workflows, focusing on AI-assisted summarization, bottleneck identification, and contextual business insights using structured workflow and planning data.
- **Ran stakeholder discovery workshops** across B2B accounts — surfacing onboarding inefficiencies, mapping process gaps, and establishing measurable success criteria for AI-assisted workflow improvements.
- Defined **compliance-aware AI workflow specifications** — incorporating validation checkpoints, exception-handling logic, and human-in-the-loop escalation steps for regulated business processes.

BoBCARD Ltd. – Product & Portfolio Manager – Credit Cards Sep 2022 – Feb 2024

- **Led product delivery of a co-branded credit card from zero** — owning functional requirements, GTM strategy, sprint planning, UAT, and production rollout across a 3-way vendor ecosystem (VisionPLUS, JOCATA, co-brand partner APIs) — delivered on time within Agile framework.
- **Owned ~70% of RP credit flow automation scope** — mapping manual touchpoints across application processing and credit decisioning workflows, defining system-driven replacement logic, and specifying exception-handling rules - reducing operational TAT and improving straight-through processing.
- **Cut onboarding TAT by 30%** by redesigning end-to-end system flows — identifying processing bottlenecks through MIS and Power BI analysis and coordinating fixes across card processing and core banking touchpoints.
- **Defined API dependency maps** and integration specifications across VisionPLUS, JOCATA, co-brand partner systems, and internal banking core — enabling zero-ambiguity sprint execution and reducing cross-team dependency conflicts.
- **Drove portfolio KPIs** — activation, spend-per-active, cross-sell, attrition, and ROI — through propensity modelling, CLV forecasting, A/B testing, and targeted segmentation campaigns.
- Translated business requirements into functional user stories with system interaction flows, API behaviour definitions, and downstream impact analysis — maintaining a prioritised backlog across business, operations, IT, and vendor teams simultaneously.

ICICI Bank Ltd. – Product Manager – Credit Cards Mar 2021 – Dec 2021

- Achieved **~20% TAT reduction** in digital card onboarding by redesigning eligibility checks, risk assessment flows, and CIBIL integration — reducing manual intervention without changing credit policy.
- Hit **~85% on-time sprint delivery** within the first quarter — clearing blockers proactively, coordinating cross-functional releases, and maintaining a tight prioritised backlog.
- Mapped API integrations and system data flows across the full issuing ecosystem, reducing dependency confusion between business, tech, and operations teams.
- Managed BAU enhancements, release coordination, and KPI tracking across onboarding, authorisation readiness, and post-issuance servicing.

HDFC Asset Management Company Ltd. – Product Manager / Business Analyst May 2016 – Feb 2021

- **Eliminated 40% of FATCA/KYC rejection errors** by running SQL-driven root-cause analysis on rejection patterns across a 400K+ investor base — identifying 6 systemic failure points and building corrective validations that held through two audit cycles.
- **Reduced investor onboarding TAT by 25%** — redesigning CRM-driven journeys end-to-end using Salesforce CRM dashboards and SQL data insights, closing 4 bottlenecks identified through funnel analysis across 3 distributor channels simultaneously.
- **Owned MVP roadmap** for 2 digital onboarding modules — prioritising 12+ features against business impact, compliance constraints, and delivery feasibility, resulting in on-time launches with zero post-go-live rollbacks.
- **Built and monitored multi-step investor journeys** in HubSpot (email, WhatsApp, landing pages) for a ₹500Cr+ AUM investor segment — improving SIP closure and re-activation rates, reducing manual sales follow-up by an estimated 30%.
- **Delivered 5 vendor and partner integrations** (CRM, RTAs, marketing platforms) from requirement alignment through UAT and go-live — maintaining 100% data reconciliation accuracy post-deployment.
- Acted as the **sole bridge** between business, operations, compliance, and technology for 5 years — translating regulatory and operational constraints into workable product specs, ensuring every sprint release passed compliance sign-off on first submission.

Education & Certifications

PGDM – IT & Marketing | Balaji Institute of Modern Management 2014 – 2016

B.Sc. Biotechnology | Govt. VYT PG Autonomous College 2011 – 2014

Google Generative AI Fundamentals | Google Cloud Skills Boost | In Progress

Skills & Tools

Product Management: Product Lifecycle Management, PRD/BRD/FRD, User Stories, Roadmaps, Backlog Prioritisation, UAT & Release Management, Agile/Scrum, SAFe, Sprint Planning, KPI Tracking, MVP, Wireframing, Figma

Domain: Credit Card Lifecycle, Cards Issuing, Authorization & Transaction Processing, KYC/AML, PCI-DSS, FATCA, RBI Guidelines, CIBIL Integration, VisionPLUS, JOCATA

AI Product: AI Use Case PRDs, LLM-assisted Workflow Design, Intelligent Automation Frameworks, Enterprise Copilot Product Design, Compliance-aware AI Specifications, System Architecture Concepts, Human-in-the-Loop Design, Low Code/ No- Code Prototyping

Analytics & Tools: SQL, Power BI, Salesforce CRM, A/B Testing, Propensity Modelling, CLV, Funnel Analysis, JIRA, Confluence, Asana
